Public Service Announcement

Reference Page Posted for Long Beach

As a public service the Graeme Hall Nature Sanctuary has set up a reference page containing copies of Environmental Impact Assessment (EIA) documents regarding the proposed Long Beach development in Barbados.

The page can be found here:

<http://www.graemehall.com/press/papers/LongBeach/>

This page will be updated as more files become available.

Sanctuary officials have been interested in the outcome at Long Beach, as both Graeme Hall and Long Beach are traditional wetland conservation areas on the South Coast.
